*Electron probability density of Hydrogen atom S-orbitals*

*Photo credit: [101 cats](#)*

*The Qubit: a two-level quantum system*

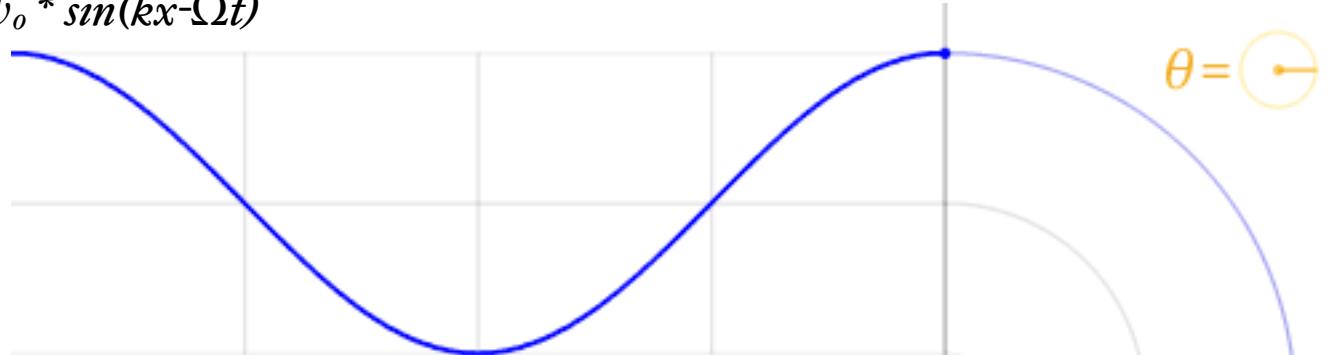

$$|\psi\rangle = \alpha|0\rangle + \beta|1\rangle$$

*Quantum State*

$$Im(\psi(t)) = \psi_o * \sin(kx - \Omega t)$$

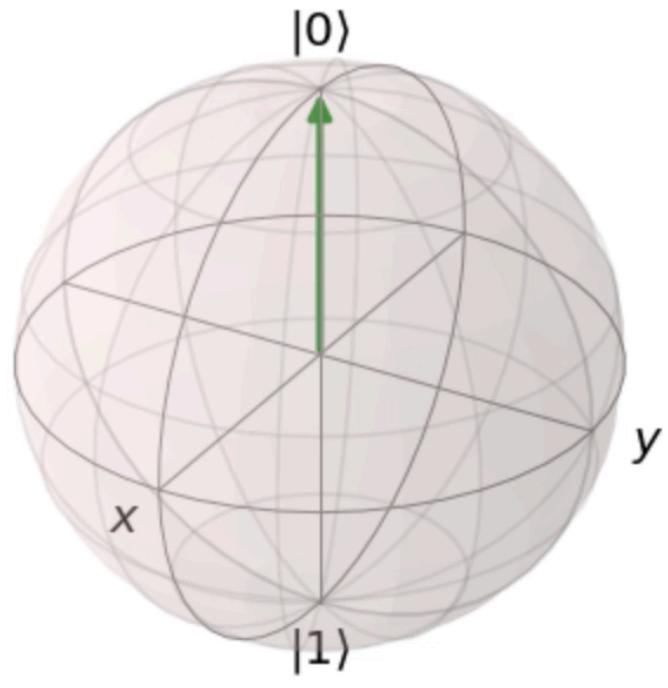

$$Re(\psi(t)) = \psi_o * \cos(kx - \Omega t)$$

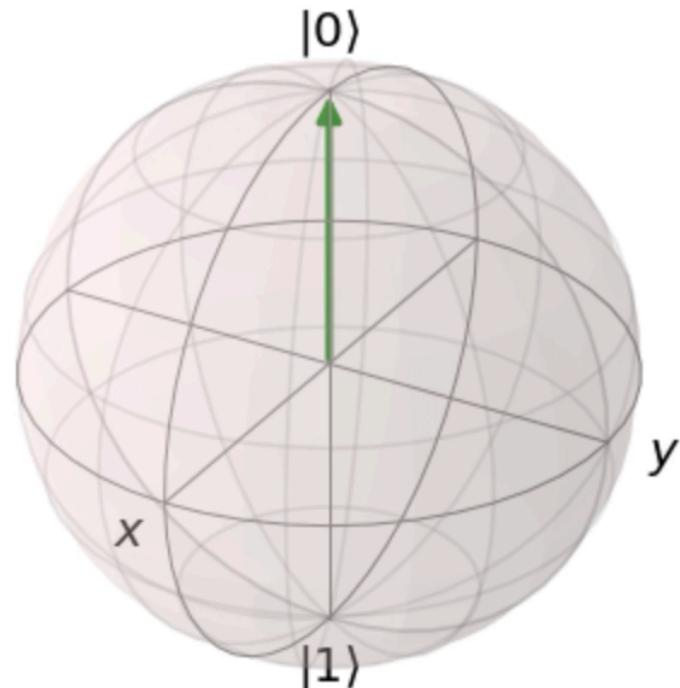

lucasvb.tumblr.com

$$\psi(t) = \psi_o e^{i(kx - \Omega t)}$$

*Bloch sphere representation of a qubit  
running  $X(\pi)$   $|0\rangle$*

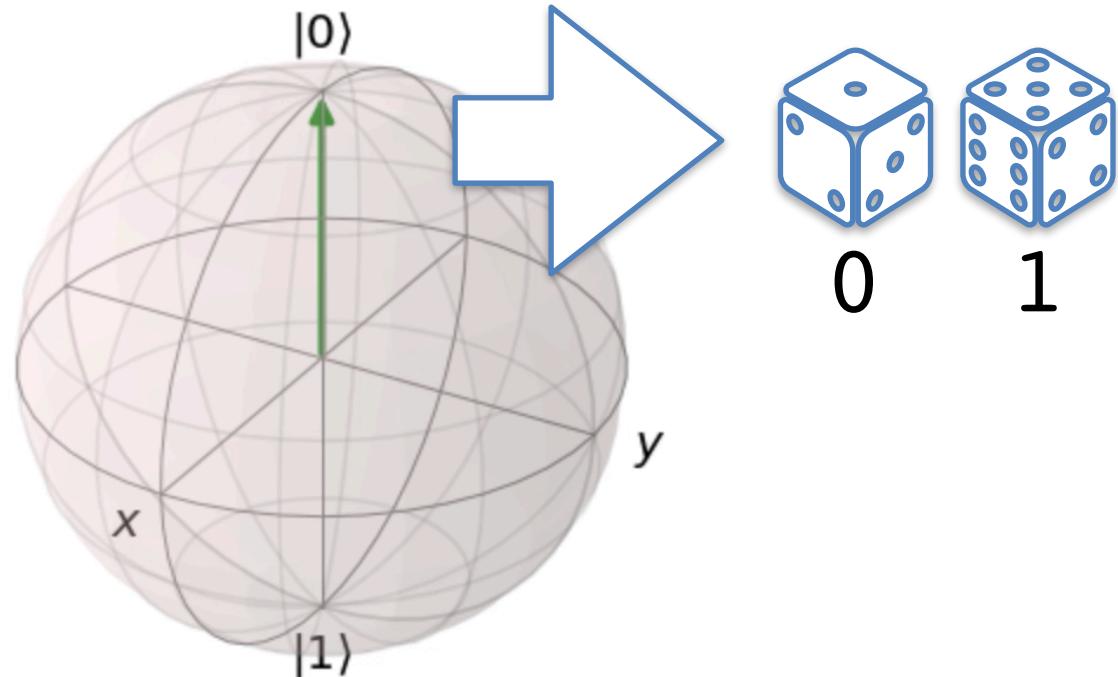

*Bloch sphere representation of a qubit  
running  $X(-\pi/2)$   $Z(\pi/2)$   $Y(\pi/2)$   $|0\rangle$*

# *Quantum vs Classical*

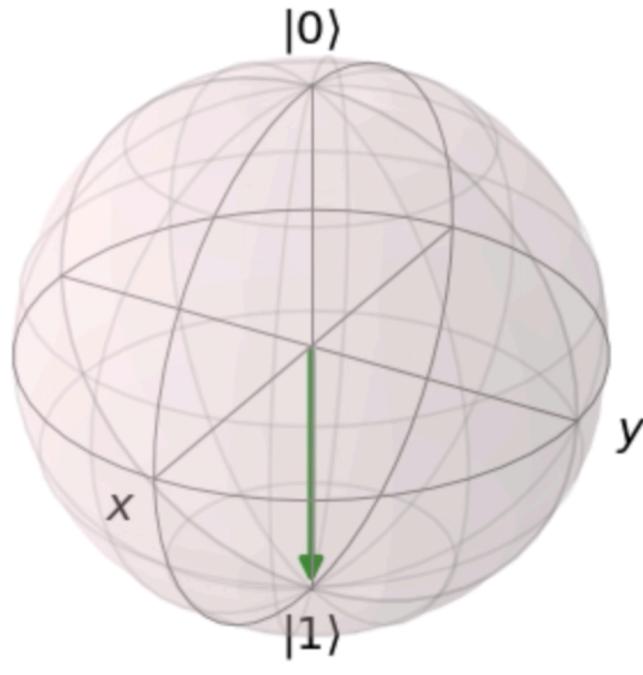

$$|\psi\rangle = \alpha|0\rangle + \beta|1\rangle$$

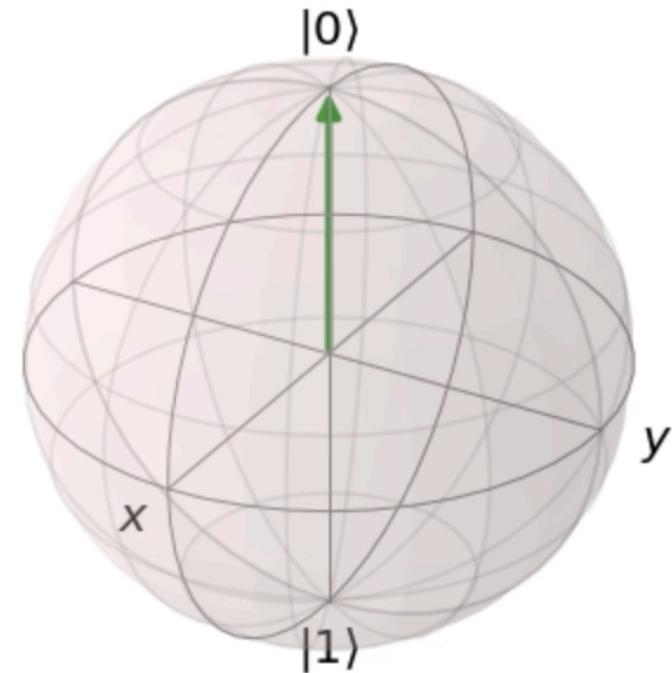

*Bloch sphere representation of a qubit  
running  $H|o\rangle$*

# Two qubit gate: $CX$

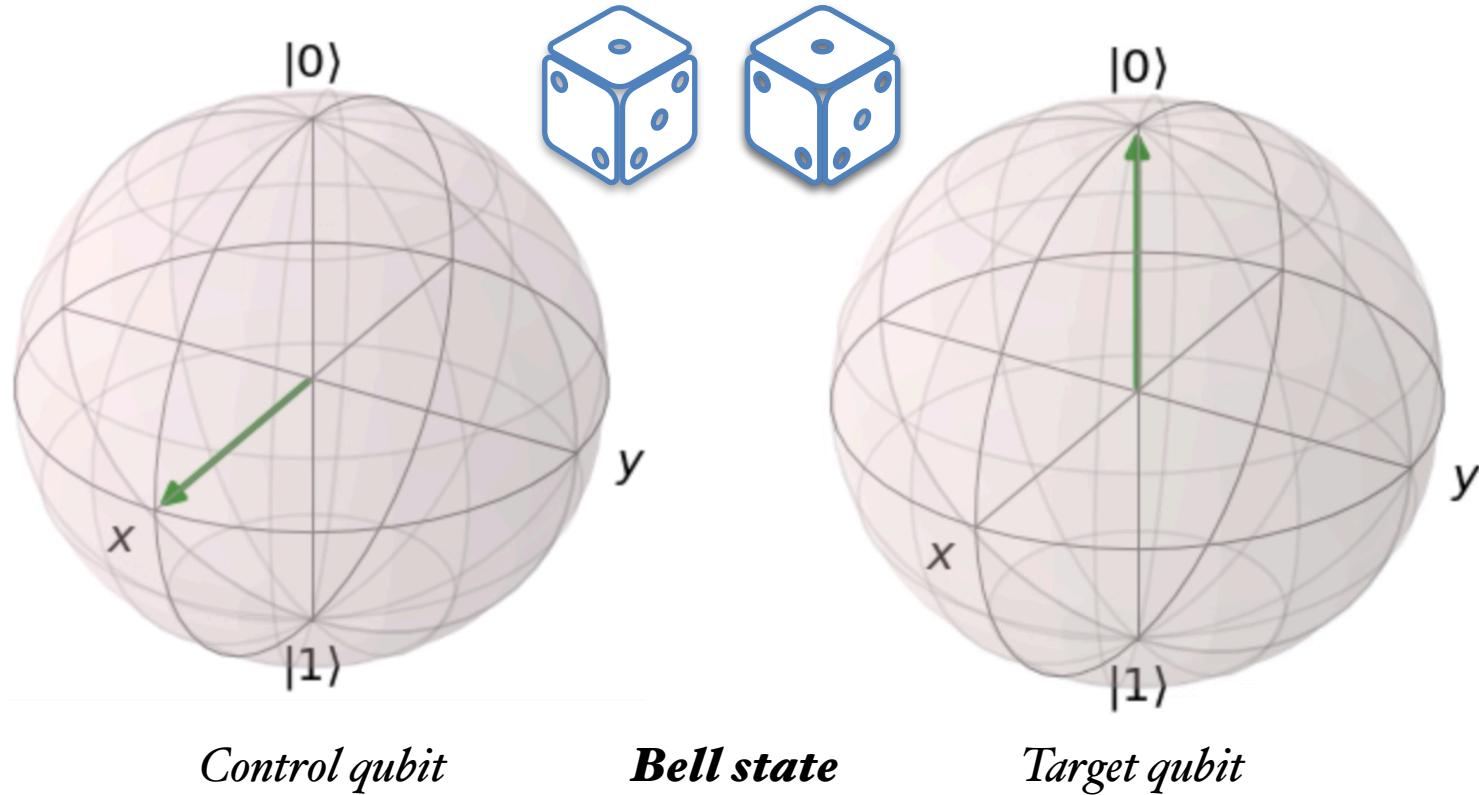

*Control qubit*

*Target qubit*

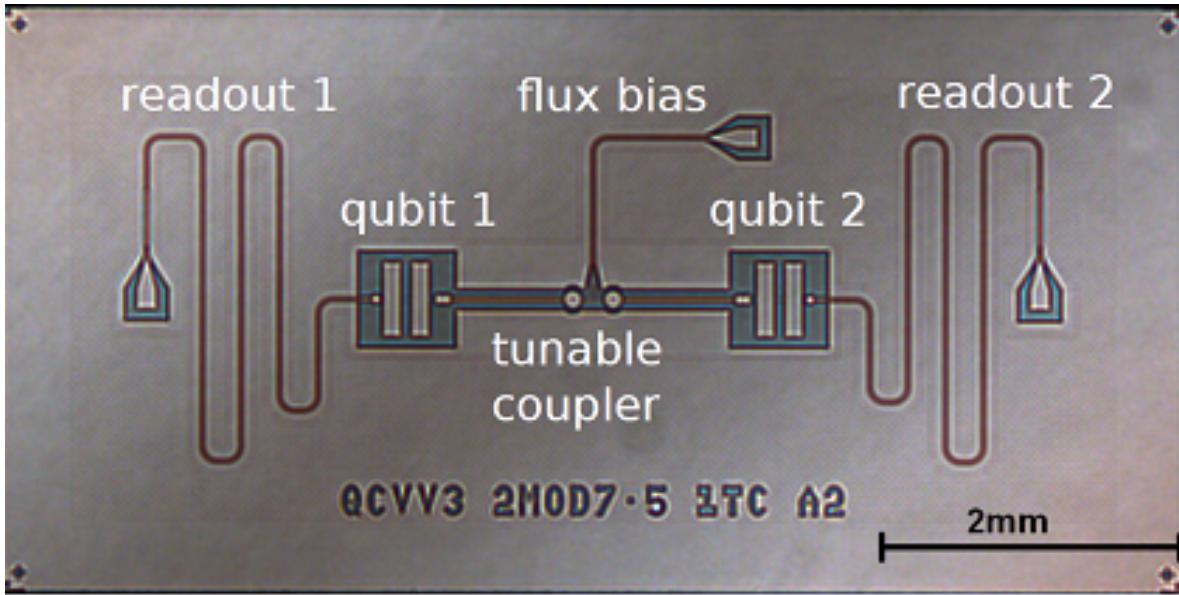

# Two qubit gate: $CX$

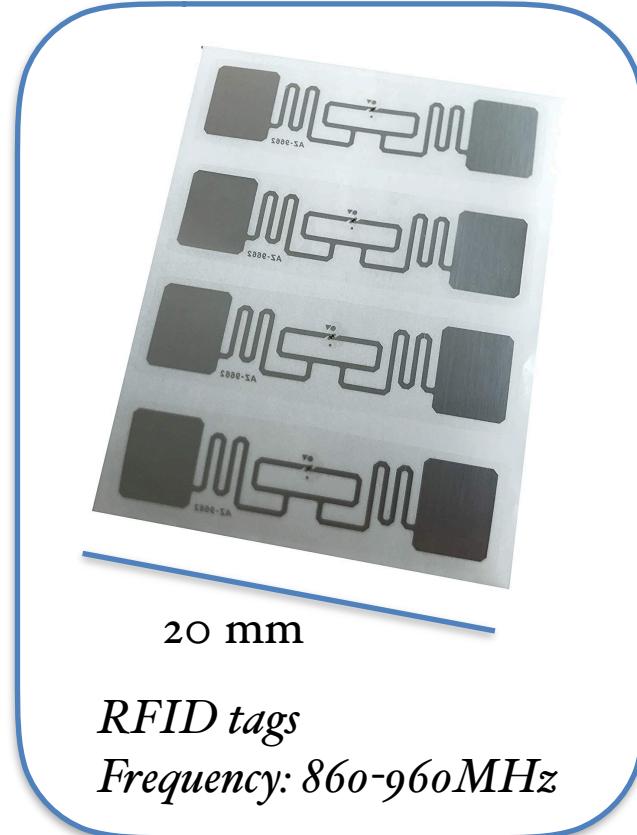

# Quantum programming

- Create and run quantum circuits using gates such as I, X, Y, Z, H, CX, CY, CZ
- *Classical* vs. *Quantum* registers
- Built-in quantum simulators
- Some can be run on real prototype hardware

# Quantum engineering

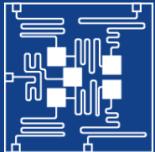

*Superconducting qubit device with two transmon-type qubits  
IBM Research - Zürich  
Frequency: 5-7 GHz*

*RFID tags  
Frequency: 860-960 MHz*
